With respect to Latex and Latex-free product -

We at Anesthesia Associates, constantly strive to provide you with the best and most appropriate anesthesia and respiratory care products available. As a means to assist those with concerns relative to natural latex allergies, and those who require access to latex-free products, most items that have been traditionally considered to be latex bearing are now available as certified latex-free products from Anesthesia Associates. However, do not assume any product, rubber like in appearance, is latex free unless it is clearly labeled as such. If in doubt, consult the factory.
